SHORT BIO / DESCRIPTION

Industrial Engineer and Earth Observation Scientist, I spent some time between Spain and UK before joining Airbus Military (former EADS CASA) as Mission Systems Instructor where I got in love with the Spanish Coast Guard (SASEMAR) activities while we were manufacturing their aircraft. I joined them as Tactical Officer in 2008 where I spent 12 awesome years flying for a cleaner and safer seas. In 2019, I cofounded Orbital EOS. We use space data and artificial intelligence to solve problems on Earth..

DESCRIPTION

After over 12 years of experience in Maritime Surveillance, we decided to fly higher, promoting a new vision of maritime data – use remote sensing and satellite imagery data analytics to solve problems on Earth. Satellites are «our eyes in Space», they see the big picture, they don't rest and they transcend all human boundaries. EOS Viewer is a SaaS platform for Earth Observation powered by Artificial Intelligence. It allows integrating and displaying value-added products derived from satellite surveillance and numerical modelling.

Go2Space-HUBs has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 870370.
