

Laia Romero

Representing Mercator Océan

WEkEO Management Team

WEB: www.wekeo.eu

SHORT BIO / DESCRIPTION

Laia is a physical oceanographer expert on radar remote sensing. She has a vast experience in Copernicus data and Information, and cloud infrastructure services, such as the Thematic Exploitation Platforms and the DIAS. She conducts technical project management and coordination of large international projects for the development of new applications. In WEkEO, Laia is part of the management team and has a broad overview of the technical activities conducted across the service with an emphasis on user management.

Mercator Océan International

MERCATOR OCEAN is an ocean data and information service provider in real and delayed time. Located in South-West France near Toulouse, MERCATOR OCEAN designs, develops and runs forecasting systems based on ocean numerical modelling fed by ocean observations, to describe the physical and biogeochemical states of the ocean at any time, above and beneath the surface, at global and regional scales. MERCATOR OCEAN is a private, non-profit company owned by nine major players in operational oceanography worldwide, that are privileged users and key scientific partners of the Copernicus Marine Service: CMCC, CNRS, Ifremer, IRD, Météo-France and the UK Met-Office, NERSC, SHOM and the Spanish Puertos del Estado.

MERCATOR OCEAN has been entrusted by the European Commission to operate Copernicus Marine Service (CMEMS).

Go2Space-HUBs has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 870370.
